this festschrift dedicated to the 60th birth anniversary of prof sandip k chakrabarti a well known indian astrophysicist presents a collection of contributions by about fifty scientists

who work on diverse topics in contemporary astrophysics and space science including new and low cost balloon borne experiments planetary science astrochemistry and the origin of life ionospheric research and earthquake predictions relativistic astrophysics around black holes and finally the observational signatures and radiative properties of compact objects all the authors are well known scholars in their respective subject and are all phd students of prof sandip k chakrabarti the book demonstrates a two dimensional evolution of research areas triggered by sandip chakrabarti over the past few decades the first dimension represents the evolution and diversification of chakrabarti s own research in which new students were trained a second dimension arises from the evolution of the research topics pursued by chakrabarti s fifty odd doctoral students many of whom have become renowned scientists in their own right after starting with a certain subject under chakrabarti and then migrating to completely new subjects with dexterity the editors have compiled and edited the articles appropriately to some extent to suit the spirit of this festschrift on the one hand and to keep balance in diverse topics on the other thus this volume also provides an overview for whosoever wishes to enter the important subjects of compact objects astrochemistry ionospheric science or space exploration in near space new graduates phd scholars teachers and researchers will benefit from this volume moreover it is a record of tremendous success of a school in a range of vast topics

as applied life science progresses becoming fully integrated into the biological chemical and engineering sciences there is a growing need for expanding life sciences research techniques anticipating the demands of various life science disciplines laboratory protocols in applied life sciences explores this development this book covers a wide spectrum of areas in the interdisciplinary fields of life sciences pharmacy medical and paramedical sciences and biotechnology it examines the principles concepts and every aspect of applicable techniques in these areas covering elementary concepts to advanced research techniques the text analyzes data through experimentation and explains the theory behind each exercise it presents each experiment with an introduction to the topic concise objectives and a list of necessary materials and reagents and introduces step by step readily feasible laboratory protocols focusing on the chemical characteristics of enzymes metabolic processes product and raw materials and on the basic mechanisms and analytical techniques involved in life science technological transformations this text provides information on the biological characteristics of living cells of different origin and the development of new life forms by genetic engineering techniques it also examines product development using biological systems including pharmaceutical food and beverage industries laboratory protocols in applied life sciences presents a nonmathematical account of the underlying principles of a variety of experimental techniques in disciplines including biotechnology analytical biochemistry clinical biochemistry biophysics molecular biology genetic engineering bioprocess technology industrial processes animal plant microbial biology computational biology biosensors each chapter is self contained and written in a style that helps students progress from basic to advanced techniques and eventually design and execute their own experiments in a given field of biology

this book presents a variety of techniques for solving ordinary differential equations analytically and features a wealth of examples focusing on the modeling of real world phenomena it begins with a basic introduction to differential equations followed by linear and nonlinear first order equations and a detailed treatment of the second order linear equations after presenting solution methods for the laplace transform and power series it lastly presents systems of equations and offers an introduction to the stability theory to help readers practice the theory covered two types of exercises are provided those that illustrate the general theory and others designed to expand on the text material detailed solutions to all the exercises are included the book is excellently suited for use as a textbook for an undergraduate class of all disciplines in ordinary differential equations

quality control and evaluation of herbal drugs brings together current thinking and practices for evaluation of natural products and traditional medicines the use of herbal medicine in therapeutics is on the rise in both developed and developing countries and this book facilitates the necessary development of quality standards for these medicines this book elucidates on various challenges and opportunities for quality evaluation of herbal drugs with several integrated approaches including metabolomics chemoprofiling marker analysis stability testing good practices for manufacturing clinical aspects ethnopharmacology and ethnomedicine inspired drug development written by prof pulok k mukherjee a leader in this field the book highlights on various methods techniques and approaches for evaluating the purity quality safety and efficacy of herbal drugs particular attention is paid to methods that assess these drugs activity the compounds responsible and their underlying mechanisms of action the book describes the quality control parameters followed in india and other countries including japan china bangladesh and other asian countries as well as the regulatory profiles of the european union and north america this book will be useful in bio prospecting of natural products and traditional medicine inspired drug discovery and development provides new information on the research and development of natural remedies essential reading on the study and use of natural resources for preventative or healing purposes brings together current thinking and practices in quality control and standardization of herbal drugs highlighting several integrated approaches for metabolomics chemo profiling and marker analysis aids in developing knowledge of various techniques including macroscopy microscopy hptlc hplc lc ms ms gc ms etc with the development of integrated methods for evaluation of botanicals used in traditional medicine assessment of herbal drugs through bio analytical techniques bioassay guided isolation enzyme inhibition pharmacological microbiological antiviral assays and safety related quality issues references global organizations such as the who usfda cdsco ayush tcm and others to serve as a comprehensive document for enforcement agencies ngos and regulatory authorities

this work provides researchers with a thorough overview of all aspects related to the development of gluten free food products in summarizing and offering critical reviews of published works and focusing on current advances and technologies in gluten free product development this book covers all of the important subjects related to this increasingly

important aspect of the food industry important case studies in gluten free breadmaking and alternative proteins are presented making this a rich and singular source for food manufacturers and scientists seeking practical knowledge on the challenges and solutions involved in the development of gluten free foods challenges and potential solutions in gluten free product development covers the latest advances and strategies for gluten free diets including the important nutritional factors involved traditional and alternative approaches for the development of gluten free dough including starch applications and microbial fermentations are extensively covered alternative proteins including those from vegetables cereals legumes and eggs are presented novel approaches for gluten free breadmaking such as aeration strategies prebiotics hydrocolloids and nutritional enhancements are also covered in depth with further chapters dedicated to regulatory aspects gluten detection methods and the global market this book presents full and up to date coverage of the development and manufacture of gluten free products

this book discusses the research progress on pathology entomology nematology and resource management of wheat and barley crops the volume summarizes the research progress and discusses the future perspectives based on current understanding of the existing issues and advancing cutting edge technologies in the field the book aims to help in deciding future research and development agenda by devising better strategies and techniques to cultivate these crops under clean and sustainable environment through this book an international group of leading wheat and barley researchers unveil the emerging concepts and issues related to biotic stresses and resource management and offers latest glimpses of technological needs and resource optimization in wheat and barley production system also key topics such as frontier mechanization technologies improved precision farming techniques pluralistic extension and policy interventions for enhancing the resource efficiency and livelihood security of the farmers are explored here this book is of interest to teachers researchers molecular breeders cereal biochemists and biotechnologists policymakers and professionals working in the area of wheat and barley research food and cereal industry also the book serves as an additional reading material for undergraduate and graduate students of agriculture and food sciences national and international agricultural scientists policy makers will also find this book to be a useful read volume 1 of new horizons in wheat and barley research covers global trends breeding and quality enhancement

this book provides unparalleled integration of fundamentals and most advanced management to make this strawberry crop highly remunerative besides enhancing per capita availability of fruit even in the non traditional regions of the world
